FILE HEADING

Special Scholarship to Mr Bavasaheb Mugavi for Studying certain Industries in Japan

From

The D.I. of Fcos

No 3660/232 Dated 29-9-9 Received 4/5-X-09

Diary No 2362	Enclos	Spare Copies	Serial No 1

BRIEF ABSTRACT OF LETTER

Recommends the grant of a scholarship of £120 a year to Mr Bavasaheb Mugavi, Supdt, Govt Ind School, Chennapatna, to enable him to study paper making & Lacquer work in Japan.

NOTES AND ORDERS

PW

Submitted for orders with Govt file No 453-09 in which Mr Bava Saheb Mugavi prayed for a Damodar Das Scholarship but it was rejected as he is not a graduate.

Notes—First sheet

GIL—0000—3107

Serial No

V The applicant seems to deserve encouragement He is an F A + has shown much aptitude for work in technical branches Though general educational qualifications not lower than the B.A should be insisted on as a ~~test~~ prima-facie test of capability for the Damodar Das Scholarships, still when in the case of a man like the applicant who has fair general educational qualifications + has shown marked capacity for technical work, an exception may well be made.

3 As regards the subject of study it would perhaps be well if Mr Miyan confines himself to Shell-lac + allied industries It is not clear whether lacquer work — which is much developed in Japan — is very much allied to lac work here or if it is Mr Miyan would do well to study it thoroughly than try to learn paper making Possibly an expert in sericulture would be more useful than an expert in paper making If the proposal to grant him a scholarship is favourably entertained, the Dy may be further consulted as to the most suitable

It is in my opinion worth starting one, if we get a proper suptd on temporary Contract & might be handed over to a private Company after its success is demonstrated. If such a thing is started, Mr Ingram or such other promising men may be placed to work there & sent abroad afterwards for further training. But at present, the idea need not be entertained. As for the training for the minor industries, we may tell the applicant that if he shows that his past trip has been beneficial practically, he may renew his application next year.

OFFICE OF THE INSPECTOR GENERAL OF EDUCATION IN MYSORE

No 3440 Sc 1+1 file / 232 Bangalore 29th September 1909

Edn 120-09
SC(1)

From

H J BHABHA Esq MA
Inspector General of Education in Mysore

To K S Chandrasekhara Iyer Esq BA BL,
Secretary to the Government of H.H.
the Maharaja of Mysore,
General and Revenue Depts,
Bangalore.

Sir,

I have the honour to submit a copy of the application from Bavasahib Inyan, Superintendent of the Government Industrial School, Channapatna praying for the grant of a Scholarship of £120 a year to enable him to proceed to Japan to learn paper-making and lacquer work which are useful industries for the State. Bavasahib Inyan is energetic, adventurous minded and takes a keen interest in manual work. The success of the Industrial School, Channapat

to mainly due to him. Bava Sahib Miyan seems to have made a good use of his recent deputation to Dehra Dun and other places to learn the manufacture of Shell-lac on large scale and the utilisation of the waste products of industry. He has submitted an interesting report of his tour. He would have been recommended for a Damodar Dass Scholarship but the rules do not allow the Scholarship to a non-graduate, Bavasahib Miyan being an F A. Under these circumstances and taking into consideration that he is very keen upon the development of new industries, I recommend that Government may be pleased to sanction a Scholarship of not less than Rs. 120/- a month from the General administration funds if an exception in his favour cannot be made to grant the same scholarship from the Damodar Dass Fund, for Bavasahib Miyan tenable for three years to enable him to learn paper manufacture and lacquerwork and if possible one or two other industries suitable to Mysore in Japan, for which there seems to be a wide scope in Mysore. He has been learning Japanese of late, and will be able

to receive instruction in technical Schools in Japan in the language of the country within a few months after he arrives there

2 Copies of his testimonials are submitted herewith

I have the honour to be,
Sir,
Your most obedient Servant,

Hajibhai
Inspector General

Thro the Inspector general of Education in Mysore,
Bangalore

To

The Secretary to Government, Genl & Rev Depts,
Bangalore -

Sir,

I beg to state that I passed my F A in the year 1900 and that I have put in 7 years service as an Assistant Master in the Govt High School, Channapatna - In consideration of my good work in the High School, the Inspector General of Education was kind enough to appoint me Superintendent of the Industrial School, Channapatna in the year 1905

I have made a special study of lac culture and lac industry and now I have been studying Practical Chemistry - I have discovered a very cheap and convenient method of protecting steel musical wires from rusting and I have greatly improved and developed the lacquer works and musical wire making — the two special industries of this place -

Now I have got a great mind to go to Japan to study some industries that are well taught there and that can with advantage be introduced into this country -

Thr

The forests of the Province abound in bamboos and timber eminently suitable for paper-making The denudation of forests in Europe and America, the inexhaustible supply of material for paper-pulp in our Province, and the ever increasing demand for paper for various purposes indicate vast possibilities for this industry.

Paper making is not a new industry for this place, for rough hand made paper was in fact being prepared by the Mahomedans of Kagazwadi, a street of this town.

I therefore request that I may kindly be granted a scholarship of £120/- a year tenable for three years to proceed to Japan together with the cost of voyage, so that I may study paper-making in the Govt. Paper manufactory at Oji near Tokyo In addition to paper making which will be the subject of my special study, I hope to learn the Japanese lacquer works, the finest in the world and introduce modifications into our methods of working with the hand lathes which are of a primitive type

I believe I am the first Mahomedan to come forward to study some industry

in a foreign country and beg that you will graciously be pleased to comply with my request and thus enable me to accomplish my long cherished object For this act of kindness I shall ever feel grateful-

I beg to remain,
Sir,
Your most obedient servant,

Chennapatna,
12th September 1908

(Signed) Sri Bavasaheb Miya

This is to certify that Mealtyzada Bavasahel Moyan has passed the FA Examination held in Decem - ber last from the Victoria College, Palghat. He was an ideal student. It is really a matter for surprise that he did not take a first class. He is very intelligent, well educated and well informed young Mohamedan of a good family and in character and conduct — thoroughly respectable

I have known Mr. M. Bavasahib Iruyan for nearly 11 years. He has passed the F.A. examination of the Madras University. In point of intelligence he is much above the average. He is a young man of remarkable industry and has great capacity for work. He is honest sincere, and is highly conscientious in the discharge of the work entrusted to him. He deserves encouragement in every way.

Headmaster, High
School, Shimoga.

Mr Basavachela Aiyan seems to have great aptitude for industrial work As Superintendent of the Channapatna Industrial School he has taken such genuine interest in its work that not only has the institution attracted a large number of pupils, 20 of whom are unpaid apprentices, but it has also created a very large demand, even beyond the limits of the Mysore State, for the articles manufactured in it The institution which in some time Confined its activities to the making of the toys for which the town has long been famous has now been successfully manufacturing also musical wares and imitation fruits The Superintendent takes an active part in the work of the institution and has introduced improvements which have extorted the admiration of local artisans of repute An attempt is being made to make arrangements for the preparation of refined lac The Superintendent wishes to proceed to Japan with a view to learn paper making and such other industrial work as may be usefully carried on in the State From his energy, intelligence and earnestness it may be safely presumed that he will be able to perform with credit the task that he has proposed to set before himself.
